

GRANITE / QUARTZ INSTALLATION PROCESS:

STEP 1 - When a client has determined that they want to refresh their space with the timeless elegance of granite or quartz, our friendly staff will join you in your home to measure the cabinet footprint and process an estimate. The estimate can be budget based or specific to a style of granite you have already selected.

STEP 2 - Once you have received the estimate and decided to move ahead, we will book you in for a private consultation at the Fabricator's indoor showroom where you can browse literally hundreds of full size granite slabs in the warmth and dryness of the indoors. Your personal guide will provide you with a wealth of knowledge on the products you are looking at to determine the perfect fit for your home and your lifestyle. Beyond color, this will include the durability, stain resistance, movement, as well as particle content and finish profiles available in the style you've selected.

STEP 3 – Should you have selected any upgrades or additional work, a revised estimate will be provided. When you come back in the store to move forward, we will review our granite/quartz installation disclosure and review all details such as scheduling, process, demo, plumbing requirements, etc..

STEP 4 – Once the granite or quartz order has been placed we will select a day for our digital templating to take place and to coordinate your existing countertop & backsplash tear out (as required). If new hardware, taps or sinks are required, we are pleased to offer our clients a gorgeous selection of Pearl sinks & faucets or special pricing at one of Calgary's finest kitchen and bath facilities offering thousands of products from trusted names such as Moen, Grohe, Delta, Price Pfister, Peerless and more. Once you've made your product selections, we will forward you an estimate for your consideration. We will order pick-up and delivery the sinks and faucets back to Cochrane. (Note: All hardware and appliance selections must be made prior to templating so the specifications are available when we are templating).

STEP 5 – Once the granite fabrication is near complete, you will be contacted again to book removal of existing countertops and installation of your new granite or quartz! We ask on the day of your installation, that you be onsite to answer any last questions and confirm your satisfaction with the installation. Be sure to have the pathway to your cabinets cleared for the Installers to bring in the slabs. Once the install is complete, we recommend another complimentary in-home consultation to confirm your backsplash selection.

STEP 6 – Relax, enjoy and show off that gorgeous new kitchen!! Oh ya, and tell'em where you got it.
